

North Carolina Financial Condition Analysis

Key: Garner

Benchmark

Benchmark peers selected:

Davidson

Report Generation: 2/26/2026 10:57:01 AM

General Fund

Resource Flow

Service Obligation

Operations ratio

Garner = 1.15, Benchmark = 0.99

Service obligation measures whether or not a government's annual revenues were sufficient to pay for annual operations. The operations ratio is calculated as total revenues divided by total expenditures (plus transfers to debt service fund).

Dependency

Intergovernmental ratio

Garner = 0.07, Benchmark = 0.32

Dependency measures the extent to which a government relies on other governments for resources. The intergovernmental ratio is calculated as total intergovernmental revenue divided by total revenue.

Financing Obligation

Debt service ratio

Garner = 0.11, Benchmark = 0.12

Financing obligation addresses service flexibility or the amount of expenditures committed to annual debt service. The debt service ratio is calculated as debt service divided by total expenditures (plus transfers to debt service fund).

Resource Stock

Liquidity

Quick ratio

Garner = 10.42, Benchmark = 10.86

Liquidity measures a government's ability to meet its short-term obligations. The quick ratio is calculated as cash & investments divided by current liabilities.

Solvency

Fund balance available as percentage of expenditures

Garner = 64.59 %, Benchmark = 70.44 %

Solvency measures a government's ability to meet long-term obligations. Fund balance as a percentage of expenditures is calculated as available fund balance divided by expenditures plus transfers out.

Leverage

Debt as percentage of assessed value

Garner = 1.67 %, Benchmark = 0.67 %

Leverage measures the extent to which a government relies on tax-supported debt. The ratio of debt as a percentage of assessed value is calculated as tax-supported, long-term debt divided by assessed value.
